

# PRIVACY MAGIC GLASS

## Let's Meet Our Switchable Privacy Glass

This is our pleasure to represent you the smartest glass of the town. Our new double layer tempered glass is not only a glass, it is a solution for business, home, hotel, institute, organization or events management, furthermore its smartness.

The latest generation of switchable double glazed panels combines the benefits of improved thermal performance with the immediate control over privacy/security. This durable solid state technology replaces the need for old fashioned blinds or curtains offering greater control and comfort within any room. The two glass panels are manufactured as a sealed unit with an air gap in between (argon filled) and the switchable film is UV bonded to the surface of the inner panel. A simple ON – OFF mode switches the glass from being clear (transparent) to frosted (translucent). Three standard panel thicknesses are available 18mm, 24mm and 28mm (custom sizes upon request). This product is simple to install just like any standard double glazed sealed unit.
